

#	FEATURE	BENEFIT
1	Lightweight Design/Easy to Carry	Ergonomically designed exterior and compact lightweight inverter unit reduce weight to 27.9 lbs. Lightest weight generator in its class
2	Noise Reducing Design (Noise Block)	Molded casing, noise-absorbing glass wool construction and a newly designed muffler produce unbeatable noise reduction
3	Long Run Time	Runs continuously for up to 12 hours without refueling (at 1/4 load*)
4	Smart Throttle	Automatically adjusts engine speed to precisely match load, resulting in greater fuel efficiency and noise reduction
5	12 Volt DC Output (Battery Charging Cables Included)	Recharge 12 volt batteries for RV, auto, marine, aircraft, etc.
6	Inverter System with Pulse Width Modulation	Industry-leading system produces higher-quality and cleaner electricity. Results in pure sine wave as clean or cleaner than commercial power and can operate products with built-in microcomputers
7	Exclusive Dual Coil Alternator Stator	Lower engine speed. Reduced noise, fuel consumption, and engine wear
8	Centralized Control Panel	Control panel enables easy access to controls
9	Fuel Petcock	Reduces carburetor contamination by turning off gasoline flow and allowing the carburetor to run dry
10	OHV 50cc Engine (Overhead Valve)	Provides improved efficiency, increased reliability, low oil consumption, and noise-reducing operation
11	Large Fuel Fill Access	Wide mouth fuel fill reduces spilling and overflow during refueling
