

#	FEATURE	BENEFIT
1	Inverter system with Pulse Width Modulation (PWM) Control	• Can run products with built-in microcomputers or microcomputer-controlled electric tools
2	"Smart Throttle" Electrical Governor	• Improves fuel economy • Reduces noise
3	Multipole alternator	• Reduces weight • Compact design • Exceptional power output to weight ratio
4	OHV engine (overhead valve)	• Improved efficiency • Increased reliability • Quieter operation
5	Cast iron cylinder lining	• Provides consistent performance during continuous use
6	Oil Watch warning system	• Prevents engine damage • Avoid costly repairs • Minimizes down time • Provides added peace of mind • Enhances long-term durability
7	USFS-approved Spark Arrestor	• Reduces chance of fires caused by an errant spark • Quiet operation
8	Noise Suppressor	• Added convenience
9	Specially designed muffler	• Reduces weight • Reduces noise
10	AC Non-fuse Thermal Breaker	• Peace of mind • Added durability
11	DC output (Battery charging cables included)	• Enables battery charging

**ACCESSORIES**
**Cover**
**Part No. ACC-GNCVR-26-00**
**Hour Meter/Tachometer**
**Part No. ENG-METER-4C-01**
